

Smart Information for a Sustainable World

DTN.IQ™ and DTN.IQFeed™

How pristine is your data stream?

DTN.IQ and DTN.IQFeed — high-quality, high-value market data from Telvent DTN

When it comes to analyzing the market and making profitable trades, there's no substitute for high-quality data. Big institutions know this and they pay top dollar for premier data services. But if you're with a small company or on your own, how do you get fast, reliable data at a price you can afford?

Through DTN.IQ.

An information aggregator since 1984, Telvent DTN is the leading supplier of data for the physical cash commodities market. We own and manage our own ticker plant and data centers to ensure optimum reliability. Our DTN.IQ product suite delivers historical and intra-day data for securities market analysis as well as additional market indicators that many competitive services don't include in their feeds.

DTN.IQ. — our data through our software

Get Tier 1 domestic market data direct from the exchanges through DTN.IQ, our powerful proprietary client application that processes Telvent DTN's Internet-delivered data feed.

DTN.IQ provides real-time streaming quotes, charts and news covering the domestic equities, foreign currency exchange and domestic and international futures markets. Included are stock and option quotes from the NASDAQ, NYSE, AMEX, Canadian and all equity option exchanges. DTN.IQ also delivers futures, futures options and futures spreads quotes from the CBOT, CME, NYMEX, COMEX, NICE, KCBT, WPG, MGE, NYSE LIFFE, LME, and SGX exchanges.

Using a standard PC, you can monitor up to 1300 symbols at a time on a customizable watch list with spreadsheet-style functionality and DDE linking capabilities. Advanced charting functions let you identify trading trends using a graphical display of tick, interval and historical data. Data is updated tick by tick in moving averages, trendlines and other analytical studies.

To help you make timely trades, DTN.IQ provides a variety of alerts — audio, onscreen, e-mail, pager, cell phone and even text-to-speech.

Keep up to date with an ever-changing market through DTN.IQ's scrolling news. You get coverage 24 hours a day, seven days a week, with thousands of full text stories from

press release wires as well as major newswires covering business, technology, commodities and finance.

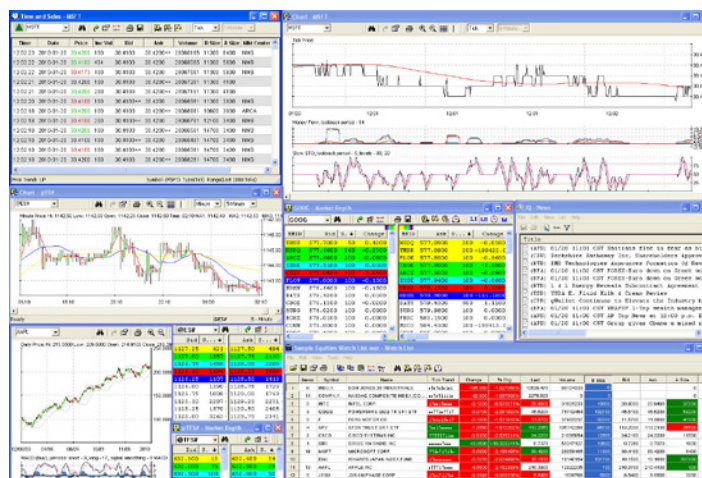

DTN.IQ. — our data through your software

If you prefer to use third-party software or your own proprietary application, you can still get Telvent DTN's fast, reliable data. DTN.IQFeed gives you a true, tick-by-tick data feed, completely unfiltered so you can see every trade and quote in real time—up to 500 symbols simultaneously.

DTN.IQFeed provides an API interface for users who want to develop their own applications. Accessible by C/C++, Visual Basic, Delphi or Java, DTN.IQFeed gives you an easy-to-use development environment for quote-rich applications. Our data is delivered via both COM and TCP/IP and includes stock, equity options, futures, futures options, futures spreads, European futures, single stock futures, E-mini quotes, streaming news and historical and intra-day data.

DTN.IQFeed is already compatible with many industry-leading third-party software packages, including Ensign Software, TradersSoft, IQXP, Medved QuoteTracker, Wave59, AbleSys, NeoTicker, AmiBroker, WealthLab, InvestorRT, and TradingSolutions.

If you've invested in your own software, why risk compromising its integrity by using a substandard feed? Get the best data available. DTN.IQFeed.

Above: DTN.IQ enables you to monitor all the information that affects your trades.
